SUBJECT: 21.1 JAGGAER Release

Good morning, RealSource Users,

This is a reminder that the JAGGAER 21.1 release will begin deployment in Production on this Friday, April 9th, starting at 9:00pm. Users may experience a downtime of RealSource during this deployment and will be notified once the deployment is completed. Part of this release, which was previously announced, will include the New User Experience. The New User Experience does not change or add new functionality to RealSource, however, it does change the look and feel of the Requisition, Purchase Order and Invoice screens. As for the overall JAGGAER 21.1 release, there will not be any noticeable impact on the functionality and usability to RealSource.

Best regards,
Procurement Services
